

MADHAV INSTITUTE OF TECHNOLOGY & SCIENCE, GWALIOR
(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

NAAC Accredited with A++ Grade

Department of Computer Science and Engineering
OOPs (3290222)) Mid-Sem

Date: 1/05/24

MM: 20

Duration: 1 hr

Set A

	Attempt all the 4 questions.	Marks	CO	BL
Q.1.	Explain unary, binary operator overloading with program?	(5)	CO3	L2, L5
Q.2.	Write a program for Type conversion?	(5)	CO5	L4
Q.3.	Write a program using explicit and implicit type casting?	(5)	CO1, 5	L3, 4
Q.4.	WAP using hierarachal inheritance for find cube and square of a number?	(5)	CO2, 5	L2, 3
	OR Write down the pitfalls of operator overloading?

NAAC Accredited with A++ Grade

Department of Computer Science and Engineering
OOPs (3290222)) Mid-Sem

Date: 19/03/24
MM: 20

Duration: 1 hr
Set A

	Attempt all the 4 questions.	Marks	CO	BL
Q.1.	Write a program for swapping in private data of classes?	(5)	CO3	L2, L5
Q.2.	. Write a C++ program to find the two repeating elements in a given array of integers	(5)	CO5	L4
Q.3.	Explain visibility modes: Private, Public, Protected with programs?	(5)	CO1, 5	L3, 4
Q.4.	Write a C++ program to implement a class called Circle that has private member variables for radius. Include member functions to calculate the circle's area and circumference.	(5)	CO2, 5	L2, 3
	OR			
	Explain Unstructured & Structured Programming with examples ?			

B.Tech. CSE and CSD First Year Examination June 2024**SUBJECT CODE: 3150222/3290222****SUBJECT TITLE: Object Oriented Programming and Methodology****Time: 2 Hours****Maximum Marks: 35**

Note:	1. Answer any five question. All question carry equal marks. 2. Assume suitable value for missing data, if any.			
Question No.		Marks	Course Outcomes	Bloom's Level
Q.1.	Write a program to swap two integers without using third variable. The swapping must be done in a function of a particular class.	(7)	CO1,2	L3
Q.2.	Create a C++ program that defines a Student class. Include a constructor that takes parameters for the student's name, age, and grade. Demonstrate how to create an instance of the Student class with specific details.	(7)	CO2,3	L4
Q.3.	Write a program for Solving tower of Hanoi?	(7)	CO4,5	L3
Q.4.	Design a class to represent a bank account. Which includes account number, name of the depositor, type of the account, balance amount in the account. Define Methods, to assign initial values, to Deposit an amount, to Withdraw amount after checking balance, to display name and balance.	(7)	CO4,5	L4
Q.5.	Write a program to find the greater of two given numbers in two different classes using friend function.	(7)	CO3,5	L2
Q.6.	Write a program of inventory of products in store, recording the details of the products is to record their code number, total item in stock and the cost of each item. Uses two classes and shows how to convert one data type to another.	(7)	CO6	L1
Q.7.	Write a program using various file stream Get(), Getline(), Put(), Open(), close().	(7)	CO6	L2
